REASONS FOR ALLOWANCE

The following is an Examiner's Statement of Reasons for Allowance:

The prior arts of record teach a method and system that includes a test harness that is executed in a first java virtual machine (JVM) and a virtual machine (VM) agent that is executed in a second JVM. In operation, the VM agent is capable of launching test applications in a second JVM based on test data received from the test harness. The test harness is capable of restarting the VM agent using if the second JVM fails. Volkov et al., U.S. Patent No. 6,839,647 is one such example of prior art. The prior arts of record, however, fails to teach, singly or in combination, capturing first screens of the first computing device that are displayed responsively to the program events while program execution and capturing second screens of the second computing device and comparing the first screens to a corresponding one of second screens. The subject matter sought to be patented as recited in the claims in this application has practical applications in the field of Hardware and software testing and verification.

Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably **accompany** the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
